

Karan Gupta, phone 555-2109, email karan.gupta@email.com. I worked at CloudFirst Technologies from 2021 to 2026 as a Cloud Engineer where I designed, implemented, and supported cloud infrastructure on Azure and AWS. I worked with virtual machines, networking, storage, IAM, monitoring, load balancers, databases, containers, and backup solutions. I used Terraform and PowerShell to automate infrastructure provisioning and configuration. I also worked with Azure Virtual Network, Azure Load Balancer, Azure Storage, Azure Monitor, AWS EC2, S3, IAM, and CloudWatch. I participated in cloud migration projects and helped teams improve availability, security, and cost management. Before that, I worked at Enterprise Systems from 2019 to 2021 as an Infrastructure Engineer supporting servers, networks, and enterprise applications. I completed a B.Tech in Information Technology in 2019. I enjoy designing reliable cloud environments and automating repetitive infrastructure work. I am looking for a Cloud Engineer position where I can work on Azure, AWS, infrastructure as code, and cloud automation.
